OUR STORY

The story of Ukraine Charity begins in 2007, when a small group of Ukrainian professionals from London visited an orphanage in Lviv, western Ukraine. It was almost Christmas, and the cold winter was setting in. They saw that the orphanage was in dire need of repairs and lacking even the most basic supplies, leaving the children without proper means to learn and play.

Greatly affected by what they saw, on their return to London, the group told their friends and colleagues about the struggling orphanage. A collection was started, and tediously, through small cash donations, funds were raised and physically taken to Ukraine, where local builders were employed to renovate the orphanage. The staff and the children were delighted with the results.

The fundraisers, however, realized that with organization, creativity and hard work, more effective fundraising could be set up for future projects. With some pro bono legal help and

strategy brainstorming, Ukraine Charity was conceived, and the rest is history.

The idea of Ukraine Charity was simple — to enable and facilitate fundraising for those based in the United Kingdom and willing to help people in need in Ukraine, particularly children.

Before the charity was established, many of our donors supported projects in Ukraine on an ad hoc basis. Ukraine Charity brought these efforts of many kind-hearted people under one roof, facilitated idea sharing and made the fundraising and project implementation streamlined and efficient.

From the beginning, Ukraine Charity has been run entirely by volunteers, through late-night coffee shop get-togethers, emails and phone calls. We have no staff or office space, and we pride ourselves on our volunteer culture, which allows the full positive impact of the funds we raise to be felt by those in Ukraine who need our help most.

FOREWORD

Since 24 February 2022, life has been forever changed for Ukraine and its people. The Ukraine Charity team is no exception. Like all Ukrainians, each member of our team will never forget the early hours of that day, being awoken by the most awful news, and an overwhelming number of phone calls and missed calls from family and friends.

Despite facing personal challenges brought on by the full-scale Russian invasion, as a charity focused on providing help to Ukraine since 2007, we were in a privileged position to assist our home country on a greater scale and more efficiently, utilizing our knowledge, experience, and well-developed network of trusted partners over the last 15 years.

The past year has been intense, with very little time for reflection or strategy. We had to focus on actively helping where we could. The charity has witnessed a remarkable increase in donations and support, attributed to the ongoing war and humanitarian crisis in Ukraine. Over this period, more than GBP 2.3 million has been raised, out of which GBP 2.15 million has been donated towards projects in Ukraine providing war crisis relief. Our administrative expenses remain very low, with only £21K spent on such expenses since February 2022. From the very beginning, Ukraine Charity has been supporting underprivileged children and providing assistance to disadvantaged families in Ukraine. However, last year we shifted our focus, with 80% of funds going towards providing emergency medical and humanitarian aid to hospitals, and the rest towards children and communities affected by the crisis. In total, we have sponsored more than 50 projects and worked with more than 60 incredible partners. Together, we have purchased thousands of tourniquets and medicines, dozens of ambulances, equipped mobile medical cabinets, supplied evacuation cars, organized medical

trainings, provided food and essential supplies, built shelters and sports grounds for children, supported the children's Paralympic team, built a sensory room for children with special needs, supported mental health programs, and much more.

Along the way, we have received a lot of corporate support and generosity. Ukraine Charity is honoured to have become a pro bono client of a leading international law firm, Covington, which helps us to implement best practice compliance policies and procedures. We also received a kind donation from Oracle and are currently implementing the NetSuite ERP system for charities' administration and financial reporting, which aims to improve the efficiency of our internal operations.

Our dedicated core team of seven people and volunteers would like to express our gratitude for the generous support and trust received from donors, supporters, partners, businesses, and the British people. It is thanks to you that Ukraine Charity has been able to contribute greatly and help those in need during the fight for the freedom of Ukraine. We are grateful for the numerous private and team fundraising initiatives, challenges, and for showing your support by joining our fundraising event and organizing your own.

We hope that you will continue to support our work, and together, we will continue to provide more and more people in Ukraine with much-needed help during the most tragic time in the modern history of our country.

With the greatest thanks and best wishes,
The Ukraine Charity team

Right on the battlefields, Hospitallers are first to help the wounded: provide first medical aid and

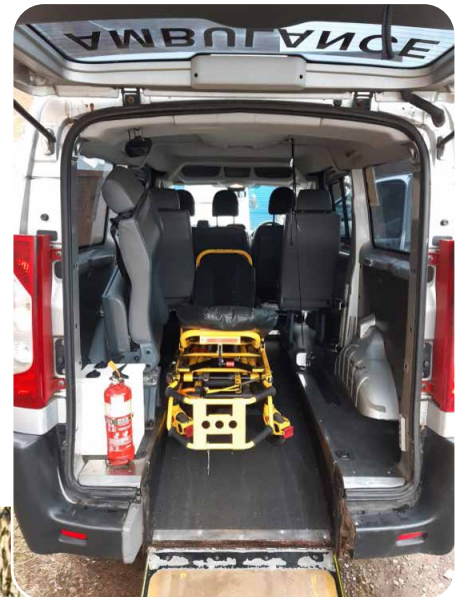

evacuate to the hospital. They also give post-hospital support and rehabilitation to people affected by military actions and their families. As of today, medical crews have already completed more than 3000 evacuations.

Hospitallers is a non-state organization which means that their collaboration with volunteers and donations is the only support they receive.

Hospitallers were one of the main fundraisers as well as the biggest recipient of the donations from Ukraine Charity since full scale Russian invasion in Ukraine started. Ukraine Charity purchased various medical supplies and equipment (including first aid kits, first aid bandages, tourniquets etc.) totaling £483k as well as 14 ambulances and 24 evacuation vehicles totaling £294k.
